## Introduction

My family tree, a work in progress beginning from my grandparents. No living people have been included. Research started in 2003 and is on-going. Mistakes are likely, either coming from source documents themselves or when I captured the information. If you spot errors or have more information, please let me know.

Have not included any detailed biographical information, nor details of any siblings of my direct ancestors. I have only included details of people that I'm fairly confident are correct.

Where a couple is listed as married, this only means that they had children together, not necessarily that they were legally married.

You are welcome to use this information for your own research. If you publish anywhere, acknowledgement will be appreciated.

## Numbering System

This family tree uses the Ahnentafel numbering system. The number of a father is always double that of his child's. The number of the mother is always double that of her child's plus one. The number of a child is always one-half that of a parent (ignoring any remainder).
